DIY PROJECT #2

Flowers provide food for pollinators. When you plant them, you create a place they can return to again and again.

What you'll need.

Simple materials you may already have:

How to Plant Seeds

1. Fill your pot with soil
2. Plant your seeds or flowers
3. Water gently
4. Place in sunlight
5. Check each day

How to Observe

You can plant your seeds in a pot or directly in a patch of soil. Place your hydration station nearby and watch who visits both.

DIY PROJECT #2

WHY IT MATTERS

Pollinators help grow the food we eat.

By planting Bee-Friendly flowers, we can provide food and energy to help them with their task.

WHO VISITED TODAY?

Pollinators you may see: Bees, Butterflies, Hoverflies, Beetles, Hummingbirds, Wasps

ABOUT EARTH LEAGUE

Earth League is a gentle, growing collection of stories and activities that help children care for the planet—starting with small, everyday actions.

Small things, done together. 

Want a simple starter?

We've created a small "Bee Kind: Pollinator Plant Patch Kit" with everything you need to get started.
